Sterling, VA • (571) 342-0012 • hire.rlangdon@protonmail.com • LinkedIn

Summary

Computer science graduate with strong foundational skills and nine months of professional experience working across the full stack. Proven ability to quickly learn and apply new technologies.

Work Experience

Application Developer May 2025 – Jan 2026
Computer Packages Inc. — Gaithersburg, MD

- Developed full stack features across an enterprise-scale ASP.NET Core MVC system to meet evolving requirements.
- Executed a database conversion using SQL Server and Microsoft Access, transferring over 40,000 records and writing validation checks to ensure data integrity.
- Created five REST API endpoints, using Postman to validate request and response behaviors.
- Diagnosed and resolved bugs using Chrome DevTools and Visual Studio debugger.
- Learned new libraries including EF Core, LINQ, and Kendo UI without impacting deliverables.

Education

B.S. in Computer Science December 2024
George Mason University — Fairfax, VA

- Honors: Magna cum laude, Dean's List all semesters
- GPA: 3.79

Projects

Sort Visualizer — Try it here August 2026

Developed a sort visualizer using Claude Code. Features six popular sorting algorithms implemented in C++. Reviewed and refined AI code output through an iterative development cycle.

Tic-Tac-Toe Portfolio — Try it here March 2025

Created a portfolio website around a tic-tac-toe game using Blazor. Allows users to play local multiplayer or against AI. The impossible AI difficulty implements the Minimax algorithm, evaluating up to 255,000 terminal positions to play the game optimally.

Skills

Languages: C#, Java, Python, Go, C, C++

Frameworks & Platforms: .NET, React, Blazor, Docker

Web Technologies: HTML5, CSS3, JavaScript, jQuery, REST API

Databases: SQL Server, SQL Developer, Oracle DBMS, MongoDB, JDBC

Version Control: Git, GitHub, GitLab, Azure DevOps

Software Development: Agile, Scrum, SDLC, CI/CD, UML Diagrams

Achievements

- Integrated Git into development workflow across 20+ personal and professional projects.
- Designed and implemented an Oracle database using SQL Developer, connected with JDBC.
- Hosted Apache web server using Docker to standardize deployment environment.
- Set up CI/CD pipeline for GitHub using Maven to automate the test and build process.
- Coordinated Scrum ceremonies among three person academic team.
