Work Experience

Application Developer

2025 – 2026

Computer Packages Inc. — Gaithersburg, MD

- Developed full stack features across an enterprise-scale ASP.NET Core MVC system to meet evolving requirements.
- Diagnosed and resolved bugs using Chrome DevTools and Visual Studio debugger.
- Executed a database conversion using SQL Server and Microsoft Access, transferring over 40,000 records and writing validation checks to ensure data integrity.
- Created five REST API endpoints, using Postman to validate request and response behaviors.
- Learned new libraries including EF Core, LINQ, and Kendo UI without impacting deliverables.

Projects

Sort Visualizer - [View it here](#)

August 2026

Developed a sort visualizer using Claude Code. Features six popular sorting algorithms implemented in C++. Reviewed and refined AI code output through an iterative development cycle.

Tic-Tac-Toe Web App - [View it here](#)

March 2025

Created a tic-tac-toe game using Blazor. Allows users to play local multiplayer or against AI. The impossible AI difficulty implements the Minimax algorithm, evaluating up to 255,000 terminal positions to play the game optimally.

PatriotHacks 2024 (Hackathon)

October 2024

Built the front end of a React web application that uses the Google Maps API to display houses for sale around a user specified location. Integrated into Django on the back end. Learned three different technologies within the 48-hour time limit.

Skills & Achievements

- Languages: C#, Java, C, Python, Go, and C++.
- Designed and implemented an Oracle database using SQL Developer, connected with JDBC.
- Use of Git workflow across 20+ personal and professional projects. (GitHub, Azure DevOps)
- Built and deployed three web applications using HTML, CSS, and JavaScript.
- Queried MongoDB database of over 2,000 movies. (NoSQL).
- Coordinated Agile development stages among three person academic team. (Scrum, SDLC)
- Hosted Apache web server using containerization software (Docker).
- Set up CI/CD pipeline for GitHub using automated build tools (Maven).
- Used Wireshark and CLI tools to analyze network activity and troubleshoot problems.
- Certified Microsoft Office Specialist.
- Experience operating and troubleshooting both Linux and Windows systems.
- Strong communication and organizational skills.

Education

B.S. in Computer Science

George Mason University; Fairfax, Virginia

Graduated December 2024

Honors: Magna cum laude, Dean's List all semesters

GPA: 3.79 In-Major GPA: 3.82
