Work Experience

Application Developer

May 2025 – January 2026

Computer Packages Inc. — Gaithersburg, MD

- Modified an enterprise-scale ASP.NET Core MVC system to implement new features and enhance existing functionality to meet evolving requirements.
- Performed a database conversion using custom SQL Server and Microsoft Access queries, ensuring accurate field mappings, data consistency, and data validation.
- Created REST API endpoints. Used Postman to validate request and response behaviors.
- Quickly became familiar with new libraries including EF Core, LINQ, and Kendo UI.

Skills & Achievements

- Experience programming with C, C#, Java, Python, Go, and JavaScript.
- Wrote two web apps independently using React and Blazor (HTML and CSS).
- Designed and implemented an Oracle database using SQL Developer, connected with JDBC.
- Queried MongoDB database of over 2,000 movies to identify patterns (NoSQL).
- Hosted Apache web server using containerization software (Docker).
- Set up CI/CD pipeline for GitHub using automated build tools (Maven).
- Used Wireshark to analyze network activity and troubleshoot problems.
- Certified Microsoft Office Specialist.
- Experience operating and troubleshooting both Linux and Windows systems.
- Strong communication and organizational skills.

Projects & Experience

Tic-Tac-Toe Web App - [View it here](#)

March 2025

Created a tic-tac-toe game using Blazor, a framework within the .NET platform. The web app is hosted on GitHub Pages and allows users to play local multiplayer or against AI. The AI has a variety of difficulty settings including an impossible mode which implements the Minimax algorithm to play the game optimally.

PatriotHacks 2024 (Hackathon)

Fall 2024

Built a React web app that used the Google Maps API to display houses for sale around a user specified location. Integrated into Django on the backend to tailor house selection to user's preferences. Learned three different technologies within the 48-hour time limit.

Kaggle Competition

Fall 2023

Participated in *Housing Prices – Advanced Regression Techniques* Kaggle competition. Worked in a team of three to create an ensemble machine learning model. Placed 796th out of 4939 entrants. Documented results in a seven-page writeup including charts to illustrate the model's capabilities.

Education

B.S. in Computer Science

George Mason University; Fairfax, Virginia

Graduated December 2024

Honors: Magna cum laude, Dean's List all semesters

GPA: 3.79 In-Major GPA: 3.82
